EDUCATION

Rutgers University, New Brunswick | Honors College
Majors: Computer Science and Mathematics, GPA: 3.95/4.0 Expected Degree: May 2027

- **Honors:** Honorable Mention for CRA Outstanding Undergraduate Research Award (2026), Rutgers Paul Robeson Scholar (2026), Rutgers Dean's Scholarship, Dean's List, SAS Excellence Award
- **Relevant Courses:** AI, ML, Algorithms, Data Management, Linear Algebra, Calculus, Probability, Analysis

Tools and Skills: Python, Java, HTML, SQL, AWS services, NumPy, Pandas

RESEARCH EXPERIENCE

Princeton Center for Information Technology Policy (CITP)
Advisor: Professor Manoel Horta Ribeiro

- **Commercial Persuasion**, *Researcher* Jun. 2026 – Present
  - Built an end-to-end pipeline to train and evaluate LLM sales persuasion
  - Fine-tuned Qwen-4B and Qwen-9B via GRPO to beat Opus 5 and GPT-5.6 sol in sales persuasion
  - Conducting a human study to validate model performance

Rutgers EconCS
Advisor: Professor Xintong Wang

- **Opponent Modeling** *(submitted to TheWebConf 2027)*, *Researcher* Apr. 2026 – Oct. 2026
  - Developed algorithms to model opponent strategies in imperfect-information games
  - Proved our algorithms converge to the opponent's true strategy
  - Ran extensive simulations, showing our algorithms do meaningfully better than established baselines
- **Decentralized Matching**, *Researcher* Jan. 2025 – Present
  - Analyzing double auctions where agents iteratively adjust bids/asks to obtain higher utility
  - Building simulations to analyze myopic strategies and their impact on dynamic market outcomes
  - Constructing formal proofs of market efficiency and convergence conditions
- **Automated Negotiation League**, *Winner* May 2025 – Aug. 2025
  - Placed 1st out of 42 international AI research teams in a multi-agent negotiation competition
  - Built on established negotiation strategies to improve offer generation and opponent modeling
  - Co-developed a modified tree search to handle trillions of outcomes in under 2 minutes
  - Independently built a separate agent that placed 1st in over 50% of practice runs, never below 3rd

Rutgers Robot Learning Lab
Advisor: Professor Abdeslam Boularias

- **Navigation Among Movable Obstacles** *(submitted to ICRA 2027), Researcher* Sep. 2025 – Sep. 2026
  - Co-formulated the task as planning chains of physically feasible pushing primitives
  - Co-developed a learned model to rank candidate pushing chains
  - Reduced planning time 3.8x in simulation and improved real-robot success over random search

INDUSTRY EXPERIENCE

Amazon Web Services, *Software Development Engineer Intern* May 2025 – Aug. 2025

- Designed automation provisioning hundreds of AWS OpenSearch clusters
- Saved dozens of developer hours per deployment by eliminating manual infrastructure setup
- Ensured safe deployment for sensitive customer data with 90%+ unit test coverage and end-to-end tests
- Coordinated with external AWS orgs to ensure compliance, scalability, and operational resilience of services

EXTRACURRICULARS

Rutgers Undergraduate Student Alliance of Computer Scientists (USACS), *Chair/Mentor*

- **Outreach/Education Chair** Jun. 2025 – Present
  - Organized tech talks, networking sessions, and tours connected 400+ students with industry professionals
  - Hosted Leetcode preparation sessions and research events to prepare students for future careers in CS
- **Road to SWE Mentor** Sep. 2025 – Present
  - Providing project-based mentorship to help students land software engineering internships
